EVAPCO's Replacement Coils Featuring the Patented Thermal-Pak® Coil

Factory Authorized Parts Designed to Meet Your Evaporative Condenser and Closed Circuit Cooler Requirements!

High Efficiency Coil

EVAPCO's patented Thermal-Pak® coil incorporates a unique elliptical tube design. This advanced technological design results in more circuits per square foot of plan area than any other manufacturers' coils (see drawing below). EVAPCO's Thermal-Pak® coil with the elliptical tubes provide maximum heat transfer and cooling capacity.

EVAPCO's Patented Thermal-Pak® Coil

- 5 circuits
- **20% more surface area** using elliptical tubes

Typical Coil (By others)

- 4 circuits
- Less surface area using round tubes and spacers between circuits

Custom Design Capacity

EVAPCO will custom design and manufacture Thermal-Pak® coils with the patented elliptical tube design for all condensers and coolers regardless of the original manufacturer. EVAPCO's Thermal-Pak® coil is guaranteed to fit your evaporative cooling equipment, match the existing piping connections and meet or exceed the original equipment performance.

Quick Shipment

Standard lead times are 2-3 weeks for replacement coils. Quicker deliveries are always available when needed.

Your local authorized **EVAPCO Mr. GoodTower® Service Center or Representative** has been factory trained to evaluate your replacement coil requirements. Contact him for replacement coils and other EVAPCO replacement parts regardless of the original equipment manufacturer.

Call **EVAPCO** at **410-756-2600** for the Mr. GoodTower® Service Center or Representative near you.

Do Your Coils Look Like This?

Corroded and Leaking Coils Will Result in:

- 30% loss of capacity with 1/32" build up of scale
- Water, glycol and chemical loss in closed circuit coolers
- Refrigerant loss in evaporative condensers
